

e.hanger

### Product Description

**Basic Use:** e.hanger is designed to properly secure an E.Series membrane assembly in place on shoring walls or below grade to vertical wall transitions on over excavated walls. Secure using galvanized steel shot pins to shoring walls after the application of the specified base sheet or directly to over excavated concrete. e.hanger allows for proper securement of heavy and robust membrane assemblies without additional system penetrations.

**Composition:** 2" x 2" galvanized steel base with 1" steel pin. Stainless steel e.hangers are also available.

### Benefits

- Ensures proper detailing of fasteners used to hold vertical membrane assemblies in place
- Eliminates the need for additional penetrations after system assembly
- Holds systems in place during shotcrete application

### Limitations

- Proper spacing and detailing must be followed to not compromise system

### Technical Data

**Specification Writer:** Contact EPRO before writing specifications on this product. E.Series system assemblies should be reviewed in order to meet project specific site conditions.

### Installation

**Preparation:** Determine fastening pattern prior to installation.

**Application:** Install after the application of base layer using 1 galvanized shot pin at opposing corners of the e.hanger. Detailing of each e.hanger should be done in accordance with the system specification.
